

Cooperation between St. Petersburg Mining University and DONNTU Goes on

Photo: Youtube Site.

In the spring of this year, St. Petersburg Mining University (SPMU) took over the patronage of Donetsk National Technical University, 50 first-year students of which came to the Northern capital in September for a one-year included training. A meeting with DONNTU students was held at the Mining Museum of St. Petersburg State University, which was timed

to coincide with the presentation of certificates for included training to Donetsk first-year students and the 300th anniversary of the birth of the coal industry in Donbas. This event was the occasion for the news story of the “Vesti – Saint Petersburg” program of the Rossiya-1 TV channel.

Three hundred years ago a self-taught geologist Georgy Kapustin discovered deposits of mining coal on the territory of modern Donbas – this is how the development of black gold began in the Russian Empire. At the end of the 19th century jackhammers replaced the hacks, which in the 20th century already helped the Stakhanovites to fulfill the monthly norm per day.

St. Petersburg State University students get acquainted with the work of miners right in the university museum. Most of the exhibits are models that amaze with their detail. Now the safety of people is one of the main priorities. Future mining engineers know this from their student days. The Rector of DONNTU Prof. Anoprienko noted that an engineer should ideally study perfectly well because a lot depends on him. A mining engineer should first of all take care of the safety of work, especially when it comes to underground mining, and in the Donbas this is mainly the case.

The name of Pyotr Gorlov is on the golden honor board of SPMU. The best graduate of the Corps of Mining Engineers stood at the origins of the Donbas coal industry, which very name, is an abbreviation of the Donetsk Coal Basin, was actually invented within the walls of the SPMU, the link of Donetsk Polytechnic University with which is becoming stronger. Today, two technical universities are partners within the framework of the program of the Ministry of Science and Education of the Russian Federation, which provides comprehensive assistance from leading Russian universities to higher educational institutions of Donbas: advanced training courses, internships, included student training, implementation

of double degree programs, exchange of experience, etc.

Timur Makarov, one of the Donetsk students who arrived to study at the Mining University, has a geodesist father. The guy followed in his footsteps, he draws and paints perfectly. Student Maria Vasilkova is a hereditary miner at all. The girl chose the Faculty of Intelligent Electric Power Engineering and Robotics, as robotics is a priority for modern coal mines.

DONNTU's Representatives Take Part in Space Bridge with Chuvashski State University Named after I.N. Ulyanov

On September 1, the 12th edition of the online talk show "Among the Roofs" took place at I. N. Ulyanov ChuvSU (Cheboksary), in which the Rector of DONNTU Prof. Anoprienko and students of the Technical University took part. The first question that was addressed to the Rector was whether DONNTU was ready for the new academic year. Prof. Anoprienko replied that, to everyone's joy, fears that due to the difficult military situation, the recruitment of first-year students would take place according to the worst scenario were not justified.

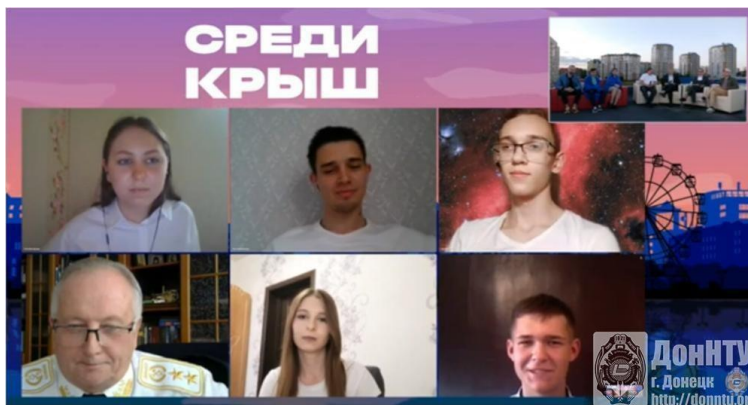

Photo: DONNTU's Site

This year it is not much less

than in the past, besides, the most persistent and motivated guys have entered the university, on whom great hopes are pinned.

In this program, a video about DONNTU was also shown, the impressions of which the Chuvash students expressed with the words: "It's a cool university!"

The students of DONNTU who took part in the teleconference told what criteria were decisive when choosing an educational institution and a future profession, that they never regretted their decision, emphasizing the positive and creative atmosphere prevailing at the university.

At the request of the presenters, Prof. Anoprienko introduced in more detail the history of the university, which stepped into its second 100th anniversary, about the events taking place in Donbas, and expressed great hopes for favorable prospects for the development of the region and the university.

At the end of the program representatives of the ChuvSU invited Donetsk polytechnics to visit them on the winter holidays, promising not only educational excursions, but also a fun student holiday.

DONNTU's New Cooperation Agreements

In September, Donetsk National University signed new cooperation agreements with the following universities of the Russian Federation: Financial University

under the Government of the Russian Federation, Ufa State Aviation Technical University, St. Petersburg State University of Industrial Technologies and Design, Siberian State University of Telecommunications and Informatics.

Within the framework of cooperation between universities, it is planned to exchange students in the main educational programs and areas of training of scientific and pedagogical personnel, integration of teaching methods, advanced training, development and implementation of joint projects in various fields of activity. Issues related to joint publications, patents, scientific topics and dissertation defenses were also discussed.

Donbas Republics Take Part in Technological Forum

Photo: Russian Centre's Site

From August 23 to 26, with the assistance of the RUSSIAN CENTER, representatives of higher educational institutions of the Donetsk People's Republic took part in the international forum "Technoprom – 2022", which was held in Novosibirsk.

The International Forum and Exhibition of Technological Development "Technoprom" is the largest technological event in Russia, the main purpose of which is to promote domestic scientific

developments and innovations, as well as to create conditions for accelerating scientific and technological development and operational implementation of science and technology achievements.

Among the participants of the forum were representatives of DONNTU.

Representatives of Donetsk National Technical University Trained at Donskoi State Technical University

Representatives of Donbas universities, including Donetsk National Technical University, were trained at Donskoi State Technical University from September 5 to 30 under the program of additional education "Topical Issues of Teaching in Educational Institutions of Higher Education: Regulatory, Psychological, Pedagogical and Methodological Support".

Groups were formed from among the students of the courses, each of which for three days got acquainted with the key issues of the implementation of higher education in the Russian Federation: regulatory and legal aspects, psychological and pedagogical technologies and the information and educational environment.

Taking into account the fact that the effectiveness of the university's activities is largely determined by the level of qualification and competence of the teaching staff, the topic of lectures was relevant for teachers of the DPR and LPR. These are the features of accreditation and licensing of educational programs according to

Russian requirements and standards, methods of psychological support and adaptation of the educational process in the circumstances, media security and work with digital tools in the field of education, as well as the regulatory environment of education and youth policy. The lecturers of the Donskoi State Technical University tried to convey to the listeners all the

Photo: DONNTU's Site

knowledge and experience they had accumulated over many years of work.

Upon completion of the training, all participants received certificates confirming professional development. Also, the students of the courses got acquainted with the creative teams of DSTU students, who presented a wonderful concert program.

DONNTU expresses its gratitude to the administration of Donskoi State Technical University, the organizers of the courses, lecturers, volunteers and art collectives of students for their knowledge, hospitality and positive emotions.

DONNTU's Teachers and Students Take part in First Meeting of Association of Cossack Universities of Russia

Teachers and students of Donetsk National Technical University took part in the first meeting of the Association of Cossack Universities of Russia – "Cossack Village – 2022", which took place within the walls of the South Russian State Polytechnic University (NPI) named after M. I. Platov.

The meeting was attended by representatives of the Ministry of Science and Higher Education of the Russian Federation, the All-Russian Cossack Society, the Government of the Rostov Region, the Plenipotentiary Representative of the President of the Russian Federation in the Southern Federal District, the Russian Orthodox Church, 17 universities of Russia, 3 universities of Donbas, as well as Melitopol State University named after A. S. Makarenko.

The forum program included a number of educational sessions and round tables, a meeting of the Association of Cossack Universities of Russia and many other events.

Photo: DONNTU's Site

Within the framework of this project, the staff exchanged experience in organizing the educational process and educating Cossack youth. The students took part in a strategy session, a seminar and a round table, where they got acquainted with the effective practices of youth Cossack organizations, and also discussed with their leaders

the problems of patriotic education and countering the falsification of history.

Refresher Courses for DONNTU's Students

"Social Project Activity of Youth and Development of Territories" was the name of the professional development program supported by the Ministry of Science and Higher Education of the Russian Federation at the site of the Russian State University for the Humanities, which was attended by 36 students of Donetsk National Technical University.

From July 15 to August 21, 14 lectures were held, during which participants got acquainted with the basics of the state youth policy of the Russian Federation, the basic principles, forms, content of social project activities; mastered the management system, the main processes of projects, the basics of startup projects; studied methods for evaluating the effectiveness and efficiency of the project. Special attention was paid to the team, the manager and the communication system in the process from the initiation of the idea to the completion of the project.

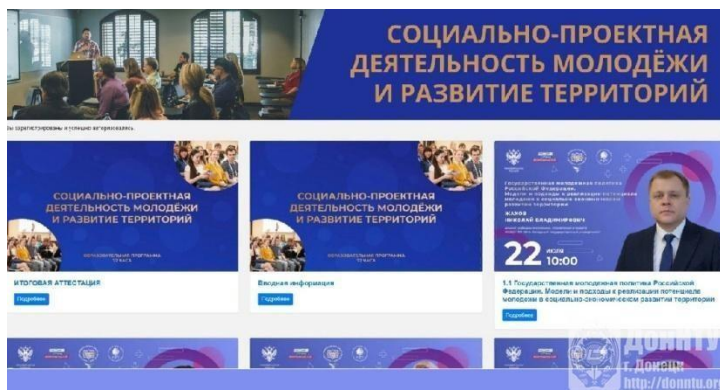

Photo: DONNTU's Site

The program gave an opportunity to fully explore the life cycle of the project; experienced speakers, using their examples, told about the most effective technologies and possible unforeseen situations, and gave advice on how to avoid them.

At the moment, there are many opportunities in the Russian Federation to implement initiatives specifically by means of project activities, and the training was aimed at the competent implementation of the idea into reality.

The result of the program was the passing of certification in the form of testing. In a month participants will receive certificates, and now they can share their acquired knowledge and develop ideas for the development of the territory of their native land.

DONNTU's Students Take Part in Forum "Stud.Party"

From August 25 to August 29 Nizhny Novgorod State University of Engineering and Economics (Knyagininsky University) hosted the student forum "Stud. Party" with the participation of representatives of the DPR and NNSUEE.

The participants of the event were students of Donetsk National Technical University Artem Kushner (the Faculty of Integrated Mechatronic Productions), Diana Dorenskaya (the Faculty of Information Systems and Technologies), Vladislav Kozlenko and Polina Stepushkina (the Faculty of Intelligent Systems and Programming).

The program of staying at the university included training workshops in the

Photo: DONNTU's Site

following areas: "Media Shooting Techniques", "Getting to Know the Device of a Quadcopter, Assembly and First Flights", Python developer and "Creating a Mobile Application Design". In addition, students had sports competitions, intellectual games,

and creative contests, excursions around the campus of

Knyagininsky University, Nizhny Novgorod and the Sura River.

The forum participants met the Rector of Knyagininsky University A. E. Shamin, the First Vice-Rector of the University A. N. Smirnov, and the Head of the Knyagininsky Municipal District E. A. Shamin and the Head of the Center for Support of Sustainable Development of Rural Territories N. P. Shkilev. During the conversation they learned about the possibilities of the university, its structure, areas of training and about the student life of Knyagininsky University. The children were interested in the issues of encouraging the best students, the work of sports sections, the organization of the educational process, leisure and much more. And then an introductory tour of the campus and academic buildings took place.

In the workshop of the Knyagininsky garment factory, the children got acquainted with the process of cutting, sewing and the range of hats produced. The students also visited Knyagininskoye Milk JSC, where they saw the full cycle of dairy production: from the receipt of raw materials to the factory to the packaging of the finished product.

All representatives of the DPR delegation had vivid memories and positive emotions from the trip to Knyaginino.

DONNTU's Students are Participants of Educational Marathon of Russian Society "Knowledge"

From August 31 to September 2 the largest Educational Marathon of the Russian Society "Knowledge" was held in five cities of the Russian Federation and the LPR. It was attended by students of Donetsk National Technical University Alyona Matvienko (the Faculty of Intelligent Systems and Programming) and Daniil Slizchenko (the Faculty of Computer Information Technology and Automation) at the thematic platform "Knowledge; Power" in the city of Moscow.

Sergey Lavrov, Dmitry Peskov, Maria Zakharova, Sergei Sobyenin, Vladimir Solovyov – and this is only a small part of the list of famous people that DonNTU students managed to attend meetings with.

The Marathon participants had the opportunity to attend lectures and participate in master classes of the most famous politicians, journalists, artists, and heads of the largest companies of the Russian Federation, to communicate with them personally and ask questions of interest to them.

Photo: DONNTU's Site

After the open lectures the most active students were given the opportunity to get to a closed meeting without cameras with celebrities. So, Daniil Slizchenko was able to communicate with the Russian blogger and writer Dmitry Puchkov, better known under the pseudonym "Senior Operative Goblin", and even take his autograph. Alyona Matvienko got to a meeting with the official representative of the Russian Foreign Ministry, Director of the Information and Press Department of the Ministry of Foreign Affairs of the Russian Federation Maria Zakharova, where she asked the diplomat all the questions she was interested in.

All lectures were broadcast live in the group of the Russian society "Knowledge" on the social network "VKontakte".

DONNTU students also took part in contests and sweepstakes from the Russian Society "Knowledge", as a result of which they received valuable prizes.

Company "Vocational Education" Congratulates on Beginning of New Academic Year!

Every year the training process improves, new formats and services appear. Only one thing remains unchanged: digital resources play a huge role in the development of new knowledge. The electronic resource of the digital educational environment for vocational education institutions regularly updates the content, which makes it an indispensable tool in the teaching process.

The Profobrazovanie Company contributes to the transfer of knowledge and opens registration for the traditional "All-Russian Digital Lesson on Working with ER DSP SPO PROFobrazovanie" for all partners and friends.

The lesson will allow students to remotely familiarize themselves with the basic principles of the electronic resource and content, learn how to use all the services of the platform, learn how they can be used in the educational process. All the participants will receive useful training materials.

Participation in the All-Russian digital lesson will be especially useful for first-year students. It is aimed at:

- To master key competencies and increase the level of digital literacy of students in the field of using digital resources;
- To receive information about the use of digital technologies in distance or hybrid learning formats;

– To improve the quality of the educational process.

The digital lesson is free to attend.

The All-Russian digital lesson will be conducted by a specialist in working with the PROFobrazovanie platform. The recording of lessons will be available to all registered participants. Classes will be held on the VK platform. To connect to the lesson, participants need to subscribe to the official IPR MEDIA group on the VK social network.

Thanks to participation in the All-Russian digital lesson students will learn to use the electronic resource PROFobrazovanie without interrupting the educational process and at a convenient time for them. This means that they will meet the new stage of their lives in full readiness to work with educational and scientific literature; many of the textbooks are included in the list.

For teachers the All-Russian digital lesson will be interesting, first of all, with the possibilities of group work and communication within an electronic resource.

The Newsletter was prepared by the International Office of DONNTU (including the materials of the newspaper "Donetsk Polytechnic").
